JOURNAL OF QUANTITATIVE SPECTROSCOPY & RADIATIVE TRANSFER

Editor
Professor S. S. Penner, *University of California (San Diego), La Jolla, CA 92093, U.S.A.*

Software Section Editor
K. G. P. Sulzmann, *Physical Dynamics Inc., 10280 North Torrey Pines Road, Suite 265, La Jolla, CA 92037, U.S.A.*

Associate Editors

Term ending 31 December 1988

C. Th. J. Alkemade, *Fysisch Laboratorium Rijksuniversiteit, Utrecht, The Netherlands*

Y. Ben-Aryeh, *Department of Physics, Technion-Israel Institute of Technology, Haifa, Israel*

H. W. Drawin, *Association EURATOM-CEA, D.R.F.C., CEN-CADARACHE, BP. 1, F-13108 - St Paul Les Durance Cedex, France*

K. Fox, *NASA Headquarters, Code EL, Washington, DC 20546, U.S.A.*

H. R. Griem, *Department of Physics and Astronomy, University of Maryland, College Park, MD 20740, U.S.A.*

D. L. Hartley, *Energy Programs 6000, Sandia National Laboratories, Albuquerque, NM 87185, U.S.A.*

B. R. Lewis, *Research School of Physical Sciences, The Australian National University, Canberra, Australia 2600*

G. Münch, *Direktor, Max-Planck-Institut für Astronomie, 6900 Heidelberg 1, Königstuhl, West Germany*

R. W. Nicholls, *Centre for Research in Experimental Space Sciences, York University, 4700 Keele Street, Downsview, Ontario, Canada M3J 1P3*

G. C. Pomraning, *School of Engineering and Applied Science, University of California, Los Angeles, CA 90024, U.S.A.*

N. N. Sobolev, *P. N. Lebedev Physical Institute of the U.S.S.R. Academy of Sciences, Leninsky Prospect 53, Moscow, U.S.S.R.*

W. L. Wiese, *National Measurements Laboratory, National Bureau of Standards, Washington, DC 20234, U.S.A.*

Term ending 31 December 1989

G. Birnbaum, *National Bureau of Standards, Office of Nondestructive Evaluation, Building 223, Room B344, Gaithersburg, MD 20899, U.S.A.*

R. D. Cess, *Institute for Atmospheric Sciences, State University of New York at Stony Brook, Stony Brook, NY 11794-2300, U.S.A.*

J. Cooper, *Joint Institute for Laboratory Astrophysics, University of Colorado, Boulder, CO 80309, U.S.A.*

R. K. Hanson, *High Temperature Gasdynamics Department of Mechanical Engineering, Stanford University, Stanford, CA 94305, U.S.A.*

P. Heinzel, *Astronomical Institute of the Czechoslovak Academy of Sciences, 251 65 Ondrejov, Czechoslovakia*

D. Hofsaess, *Institut für Theoretische Physik und Sterwarte, Universität Kiel, D-23 Kiel, West Germany*

M. Lapp, *Sandia National Laboratories, Combustion Research Facility, Livermore, CA 94550, U.S.A.*

H. Schlüter, *Institut für Experimentalphysik, Ruhr-Universität Bochum, Gebaude NB 5/131, 4630 Bochum 1, West Germany*

I. I. Sobelmann, *P. N. Lebedev Physical Institute of the U.S.S.R. Academy of Sciences, Leninsky Prospect 53, Moscow, U.S.S.R.*

C. L. Tien, *Mechanical Engineering Department, University of California, Berkeley, CA 94720, U.S.A.*

M. Tanaka, *Upper Atmosphere Research Laboratory, Tohoku University, Katahira-cho 2-1-1, Sendai 980, Japan*

Term ending 31 December 1990

J. O. Arnold, *Physical Sciences Br., NASA, AMES Research Center, Mail Stop STS: 230-3, Moffett Field, CA 94035, U.S.A.*

J.-P. Bouanich, *Laboratoire d'Infrarouge Associé au C.N.R.S., Université de Paris-Sud, Bâtiment 350, 91405 Orsay Cedex, France*

M. Cattani, *Instituto de Fisica da Universidade de São Paulo, C. P. 20516, São Paulo, Brazil*

A. L. Crosbie, *Thermal Radiative Transfer Group, Department of Mechanical and Aerospace Engineering, University of Missouri-Rolla, Rolla, MO 65401, U.S.A.*

J. Davis, *Plasma Dynamics Branch, Naval Research Laboratory, Washington, DC 20375, U.S.A.*

A. Karp, *IBM Systems Center, 18100 Frederick Pike, Gaithersburg, MD 20879, U.S.A.*

R. W. Lee, *Lawrence Livermore National Laboratory, P. O. Box 808, Livermore, CA 94550, U.S.A.*

D. Mihalas, *Department of Astronomy, University of Illinois, 1011 W. Springfield Avenue, Urbana, IL 61801, U.S.A.*

J. Migdałek, *Institute of Physics, Pedagogical University of Krakow, 2 Podchorazyck Street, 30-084 Krakow, Poland*

C. E. Siewert, *Department of Mathematics, North Carolina State University, Raleigh, NC 27695-8205, U.S.A.*

P. Varanasi, *Institute for Atmospheric Sciences, State University of New York at Stony Brook, Stony Brook, NY 11794-2300, U.S.A.*

W. Whaling, *Department of Physics, California Institute of Technology, Pasadena, CA 91125, U.S.A.*

Publishing Office: Journals Production Unit, Pergamon Press plc, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749).

Subscription and Advertising Offices: *North America:* Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.; *Rest of the World:* Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England (*Tel.* Oxford (0865) 64881).

Subscription Rates: annual institutional subscription rate (1989) DM 1460.00; 2-year institutional rate (1989/90) DM 2774.00; personal subscription rate for those whose library subscribes at the regular rate (1989) DM 185.00. Prices are subject to amendment without notice.

Microform Subscriptions and Back Issues: Back issues of all previously published volumes are available direct from Pergamon Press. Back issues of Pergamon journals in microform can be obtained from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.

Published Monthly—Two volumes per annum. Copyright © 1988. Pergamon Press plc

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.: The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970.

Permission for other use: The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is 0022-4073/88 $3.00 + 0.00

List of Contents

NUMBER 1

B. R. Lewis, S. T. Gibson, M. Emami, and **J. H. Carver** — 1 Resonances in the photodissociation of isotopic molecular oxygen—I. The longest band

B. C. Fawcett and **R. D. Cowan** — 15 A study of theoretical computations of oscillator strengths for Fe I

Kouichi Kamiuto — 21 The diffraction-scattering subtraction method for highly anisotropic scattering problems

M. K. Prasad, A. I. Shestakov, D. S. Kershaw, and **G. B. Zimmerman** — 29 Diffusion coefficient for the Compton Fokker–Planck equation

Richard L. Crownover, Randy A. Booker, Frank C. De Lucia, and **Paul Helminger** — 39 The rotational spectrum of nitric acid: the first five vibrational states

Kouichi Kamiuto — 47 A constrained least-squares method for limited inverse scattering problems

T. Nakajima and **M. Tanaka** — 51 Algorithms for radiative intensity calculations in moderately thick atmospheres using a truncation approximation

S. A. El-Wakil, M. H. Haggag, M. T. Attia, and **E. A. Saad** — 71 Radiative transfer in an inhomogeneous sphere

Note

A. Suresh Kumar and **S. Buddhudu** — 79 Spectral studies on the $Nd(NO_3)_36H_2O$ organic acid complexes

Corrigenda — 83

Software Survey Section — I Implementation of the Grant's Relativistic Multiconfiguration Dirac–Fock Program on Microcomputers

NUMBER 2

Y. Mekler and **D. Goorvitch** — 85 Detectability criteria of forbidden lines of NII and OIII

J. M. Hartmann, L. Rosenmann, and **J. Taine** — 93 Temperature and pressure dependences of absorption in the narrow R_{66}–R_{68} window of the $^{12}C^{16}O_2$ ν_3-band

A. Streater, W. Molander, and **J. Cooper** — 101 Experiments on time-dependent radiative transfer in a spectral line

A. L. Crosbie and **R. L. Dougherty** — 123 Influence of refractive index on the two-dimensional back-scattering of a laser beam: asymptotic solutions

Thomas M. Goyette, William L. Ebenstein, Shelley L. Shostak, Frank C. De Lucia, and Paul Helminger 129 Pressure broadening of NO_2, CF_2Cl_2, HDO and HOOH by O_2 and N_2 in the millimeter wave region

K. Yuasa, H. M. J. Willems, B. van der Sijde, and D. C. Schram 135 Laser-fluorescence experiments with a continuous argon-ion laser in an argon plasma

K. Musioł, S. Labuz, and B. Pokrzywka 143 Measurements of some plasma-broadened GeI spectral line profiles

Ranga B. Myneni, Ghassem Asrar, and Edward T. Kanemasu 147 Finite element discrete ordinates method for radiative transfer in non-rotationally invariant scattering media: application to the leaf canopy problem

Ranga B. Myneni, Ghassem Asrar, and Edward T. Kanemasu 157 Solution of an integral equation encountered in studies on radiative transfer in completely absorbing leaf canopies

Note

Ranga B. Myneni and Edward T. Kanemasu 165 The hot spot of vegetation canopies

Software Survey Section I

NUMBER 3

QUANTITATIVE SPECTROSCOPY AND LASER DIAGNOSTICS

Foreword vii

Basic spectroscopic data of atmospheric and astrophysical interest

Prasad Varanasi 169 On the nature of the infrared spectrum of water vapor between 8 and 14 μm

Kenneth Fox and Sang J. Kim 177 Spectra of van der Waals complexes (dimers) with applications to planetary atmospheres

Nguyen-Van-Thanh and I. Rossi 185 Far-infrared collision-induced absorption in some compressed gaseous polar molecules of atmospheric interest

C. Chackerian, Jr. 195 The determination of absolute ro-vibrational intensities for radical diatomic molecules

William Malkmus 201 Some comments on the extension of band models to include scattering

J.-P. Bouanich and G. Blanquet 205 Pressure broadening of CO and OCS spectral lines

D. E. Jennings 221 Laboratory diode laser spectroscopy in molecular planetary astronomy

Christopher R. Webster	239	Stratospheric composition measurements of Earth and Titan using high-resolution tunable diode laser spectroscopy
Max Loewenstein	249	Diode laser harmonic spectroscopy applied to *in situ* measurements of atmospheric trace molecules
A. Chedin, N. A. Scott, N. Husson, J. F. Flobert, C. Levy, and **P. Moine**	257	Satellite meteorology and atmospheric spectroscopy: recent progress in Earth remote sensing from the satellites of the TIROS-N series
R. W. Nicholls	275	Realistic syntheses of atmospheric and interstellar extinction spectra
Laser diagnostics in combustion science and fluid mechanics		
D. L. Hartley	291	The impact of spectroscopy and diagnostics on combustion research
C. P. Wang	309	Laser Doppler velocimetry
Jay M. Bernard	321	Particle sizing in combustion systems using scattered laser light
K. G. P. Sulzmann	331	Absorption/emission spectroscopy and applications using shock tubes
Ronald K. Hanson	343	Planar laser-induced fluorescence imaging
Marshall Lapp, Michael C. Drake, C. Murray Penney, and **Robert W. Pitz**	363	Flame images from pointwise Raman data
Alan C. Eckbreth	369	Nonlinear Raman spectroscopy for combustion diagnostics
Atomic and plasma spectroscopy		
C. Th. J. Alkemade	385	Laser atomic spectroscopy in flames, gases and beams
Hans R. Griem	403	Electron–ion collisional rate coefficients from time-dependent plasmas
W. L. Wiese	421	The atomic transition probabilities of argon—a continuing challenge to plasma spectroscopy
M. Sassi and **J. W. Daily**	429	Doppler shift methods for plasma diagnostics
Laser/material interactions		
Bryan J. Ortman, Robert H. Hauge, and **John L. Margrave**	439	Chemical reactions of carbon atoms and molecules from laser-induced vaporization of graphite, TaC and WC
Arthur A. Boni, David I. Rosen, Steven J. Davis, and **Leslie A. Popper**	449	High-power laser applications to medicine
Software Survey Section	I	

NUMBER 4

B. R. Lewis, S. T. Gibson, M. Emami, and J. H. Carver	469	Resonances in the photodissociation of isotopic molecular oxygen—II. The second and third bands
G. C. Pomraning	479	Radiative transfer in random media with scattering
J. M. Hartmann, C. Camy-Peyret, J. M. Flaud, J. Bonamy, and D. Robert	489	New accurate calculations of ozone line-broadening by O_2 and N_2
V. Kushawaha and A. Michael	497	HgBr(B–X) formation due to collisions of Ar^+/Ar_2^+ and $HgBr_2$
J. Wang, A. J. Blake, D. G. McCoy, and L. Torop	501	Effects of the close approach of potential curves in photoabsorption by diatomic molecules—III. Structure and isotope shift of the 124.4 nm band of oxygen
H. O. Di Rocco, G. Bertuccelli, J. Reyna Almandos, F. Bredice, and M. Gallardo	513	Line shifts of Kr II, Kr III, and Xe III in high-current, pinched discharges
Masaaki Yamagishi, Katsuhiro Mizuno, John De Groot, and Toshiatsu Oda	519	Spectroscopic measurements of air plasma
P. S. Swathi and T. W. Tong	525	A new algorithm for computing the scattering coefficients of highly absorbing cylinders
Isao Hirano	531	Effect of intersection angle between saturation and probe beams on saturated absorption spectra of the Cs-D_2 line
G. M. Shved, A. G. Ishov, and I. A. Podgorny	539	Universal functions for estimating total vibration–rotation band absorptance—IV. Extension of the method and its applicability to the Doppler line shape
Software Survey Section	I	

NUMBER 5

C.-H. Ho and M. N. Özişik	553	Inverse radiation problems in inhomogeneous media
R. W. Lee	561	Plasma line shapes for selected transitions in hydrogen-, helium- and lithium-like ions
L. Rosenmann, M. Y. Perrin, J. M. Hartmann, and J. Taine	569	Diode-laser measurements and calculations of CO_2-line-broadening by H_2O from 416 to 805 K and by N_2 from 296 to 803 K
A. I. Shestakov, D. S. Kershaw, and M. K. Prasad	577	Evaluation of integrals of the Compton scattering cross-section
K. H. Byun and T. F. Smith	591	Development of the zone method for linearly-anisotropic scattering media

G. D. T. Tejwani	605	Improved calculated linewidths for H_2O broadened by N_2
A. Bechler, Y. Kuang, and **R. H. Pratt**	613	Elastic scattering of photons by bound electrons in hot and dense aluminum plasmas
S. A. El-Wakil, E. A. Saad, M. Abdel Krim, M. T. Attia, and **A. El-Sheikh**	619	Radiation transfer problems with reflective boundary conditions and internal sources
John D. Hey and **Jacqueline E. King**	629	Oscillator strengths for six multiplets of neutral oxygen
Note		
D. K. Pandey	633	Exponential functions for the cylindrical-exponential integrals $D_2(x)$ and $D_3(x)$
Software Survey Section	I	

NUMBER 6

GAMMA-RAY LASERS

Preface	v	
R. W. Bauer, J. A. Becker, E. A. Henry, and **K. E. Sale**	637	Spectrometry for spin and shape isomer identification
E. D. Arthur, and **D. C. George**	651	Status of current nuclear structure data bases for gamma-ray laser applications
Agda Artna-Cohen	663	Compilation of low-energy gamma rays
G. C. Baldwin	685	Superlattice geometry for gamma-ray lasers
G. T. Trammell, J. T. Hutton, and **J. P. Hannon**	693	Perfect crystal grasers
F. X. Hartmann, S. R. Rotman, and **K. K. Garcia**	701	Symmetry approach to coherence in spontaneous nuclear decay
Johndale C. Solem, and **Lawrence C. Biedenharn**	707	Laser coupling to nuclei via collective electronic oscillations—a simple heuristic model study
Johndale C. Solem	713	Theorem relating spatial and temporal harmonics for nuclear interlevel transfer driven by collective electronic oscillation
J. F. Berger, D. Gogny, and **M S. Weiss**	717	Nuclear excitation via the motion of electrons in a strong laser field
Leslie Cohen	735	Graser with recoil
D. A. Sparrow, B. Balko, and **S. Dixit**	741	An examination of the pumping requirements for multi-photon deexcitations of isomeric levels

B. Balko 751 An investigation into the possibility of lasing directly from an isomeric level

Gilbert R. Hoy, and **R. Dean Taylor** 763 Some Mössbauer Effect considerations in gamma-ray laser development

R. Coussement, P. Boolchand, G. Scheveneels, F. Hardeman, and **P. Put** 773 Level Mixing Resonance Spectroscopy (LEMS)—a novel probe of non-linear nuclear quadrupole resonance

P. Boolchand 777 Experimentally realized linewidths of narrow ($\leqslant 10^{-10}$ eV) nuclear gamma resonances
